Subject: Notification of Hazardous Waste

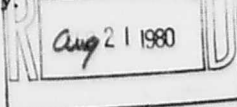

Gentlemen:

In reviewing the enclosed mailing from your department it was determined that Cooper Energy Services at 9019 Premier Row, Dallas, Texas 75247 location is not affected by the new hazardous waste regulations. This letter and the return of the material you sent is our notification in complying with the law.

Our operation is warehousing and distribution of industrial engine repair parts and as a handler of hazardous waste as a generator, transporter, treater, storer, or disposer is not applicable. The only category which we may fall under (not definite) is as a generator of hazardous waste. In our building we have a small spray booth (paint and rust preservative) with a 34 inch exhaust fan that is never used because the functions set out for this operation have in the past and present been performed in our manufacturing locations of the Northeast. (Labor agreement has prevented the transfer of this application to our location.) The second and last function that may apply is our 20 gallon drum and tank mounted (leased by Safety-Kleen) to pump solvents (mixture of hydrocarbons) for parts washing and cleaning purposes. Safety-Kleen services this equipment by removing the spent solvent and takes responsibility for disposal of same.

In a phone conversation this date with your Mr. Jerry Trezzo it was agreed under Federal Register, page 33120, section 261.5, and page 33124, section 261.33 that we comply in this manner. Item IX, section "C", EPA Form 8700-12 was not completed with a four-digit number because of the inability to identify.
